GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

Read—the following papers:—

I

Letter—from S. B. Murray, Esq., Superintending Engineer, VI Circle.
To—the Chief Engineer for Irrigation.
Dated—Trichinopoly, the 4th September 1906.
No.—515 C.E.

I have the honour to forward herewith, for your approval and sanction of Government, an estimate, amounting to Rs. 1,190, for improvements to No. 3 Thutheri Kunmoy, a Periyár affected tank, fed by a distributary from the Chunambur offtake of the X Branch channel, in the Mélúr taluk, Madura district.

2. The proposed improvements consist of constructing revetment to the portion of the tank bund which has been very much eroded by wave action.

3. The work may be classed as "unremunerative", but is required for the development of the Periyár project, and will be completed by the 31st March 1907.

4. Early sanction to the estimate is requested.

Enclosure.

Report to accompany the estimate for improvements to No. 3 Thutheri tank, Mélúr taluk.

	RS.
Amount of estimate	1,190

This is one of the Periyár affected tanks ordered to be maintained according to G.O., No. 1250 I., dated 15th December 1905. It has an ayacut of 209 acres yielding a revenue of Rs. 1,000.

The descriptive memoir sheet attached shows that the surplus arrangements are adequate to dispose of the total maximum quantity of surplus estimated as likely to enter the tank.

Three masonry sluices were constructed during the last year to command the whole ayacut, under an estimate sanctioned by the Superintending Engineer.

To bring the section of the bund to the standard noted in the memoir sheet, an estimate, amounting to Rs. 340, was sanctioned by the Superintending Engineer under "repairs" and the work is now put in progress.

As can be seen from the level section enclosed the tank bund has been very much eroded owing to the action of waves. It is now proposed to revet the bund to a height of 1 foot above M.W.L. allowing a slope of 1 to 1.

II

Note by the Chief Engineer for Irrigation.

The Superintending Engineer, VI Circle, submits an estimate, amounting to Rs. 1,190, for improving No. 3 Thutheri Kunmoy, Periyár Project. It is stated that the tank has an ayacut of 209 acres yielding a revenue of Rs. 1,000 and is supplied by a distributary from the Chunambur offtake of the X Branch channel of the project. The improvement proposed consists of providing revetment to the portion of the tank bund, which has become very much eroded by wave action. It is recommended that the estimate be sanctioned.

2. The work is classed as "unremunerative" and will probably be completed by 31st March 1907.

C. A. Smith,
26th October 1906. *Chief Engineer for Irrigation.*
